So called night

# OrsaMaggiore®

So called night

What interests me: I write poetry and learn different things from poetry. Prose. Illumination, inspiration, clarity, higher consciousness and everything that has to do with them. The ways to reach them. Finding my own way to reach them. Different knowledge, unknown to science. The zero and the number. Numbers, particularly if not linked to a sequential order. Signs, letters. Typography and calligraphy. All that is logically meaningless and absurd. All that causes laughter. Humor. Stupidity. Natural thinkers. Omens, old ones and new ones invented no matter by whom. Miracles. Sleight of hand (no gimmicks). Interpersonal relationships between human individuals. A good education. Human faces. Odors. Overcoming the squeamishness. Washing, swimming and bathing. Cleanliness and filth. Food. The preparation of certain dishes. A table set for lunch. The arrangement of an apartment and a bedroom. Clothes for men and women. Questions about how to wear clothes. Smoking (pipe and cigar). What men do when they are alone with themselves. Notebooks of notes. Writing on paper with ink or pencil. Paper, ink, pencil. The daily record of events. Making a note of the weather conditions. The phases of the moon. The appearance of the sky and water. The wheel. Canes, walking sticks, scepters. An anthill. Small dogs with smooth hair. Cabals. Pythagoras. The theater (what I feel my own). Singing. Religious services and song. All kinds of rituals. Pocket watches and chronometers. The starched wing collar. Women, but only those of the type that I prefer...

Daniil Charms

## **Personality, style, passion, mastery. In other words, a rare virtuosity.**

Sleep is as much a natural phenomenon as one essential to ensure the body has the perfect psychophysical balance. Scientific observation and further clinical studies have confirmed how, without adequate support, quality is compromised and also the well-being that results from it during the day. For this reason the bedding element (that is, the bed) has become more elaborate, technologically advanced and sophisticated over time: applied research carried out in the bedding industry has developed new and better materials and components which can greatly increase the comfort and quality of rest.

Therefore sleeping well actively improves personal well-being, so choosing a bed-system which suits every individual need can be easily transformed into a more restful and regenerating sleep. Simple conclusions, certainly, but they're the basis of what is, in fact, the 'culture of sleep': 'sleeping well' today is socially important, involving fads, trends, schools of thought..., so a 'culture' in all respects. Choosing the bed-system carefully is important, just as it is essential to know how it is made inside, where the well-being of sleep arises.

Like any product that plays an important role in our everyday life, even the bed-system must be able to convey ideas and meanings which characterize its creation: a product which has its own personality. So here's how the highest levels of comfort and functionality take on that charm and subtle elegance typical of the cosmopolitan style which characterizes our modern society; the search for essentiality based on a clear and linear vision of the product, its state-of-the-art manufacturing, moderate and flawless, and at the same time versatile.

This personality helps to emphasize what the basic prerequisites of the product are, and it focuses on the warmth and intimacy which each of us wants to find every day in the bedroom. Ours is the result of a consideration of the 'bed' experience, because the house is the ambience which expresses our personality, our taste, our conception of warmth and hospitality, like a personal little artwork which reflects us. And inside the house, the bed is the richest element of symbolic, emotional and concrete meanings.

So, what interests us? Hence Mr. Charms' thinking: think and apply, mix design and comfort intelligently. Enhance the simplicity of objects. A strong and easygoing personality. Ourselves. The woolen blankets laid at the bottom of the bed and the covers that make them warm. The soft volume of pillows and the enveloping comfort of the mattress. Softness. Sensations. A hug. The warmth of intimacy that can be found only in the bedroom.

"Orsa Maggiore is a clear example of a renewed Italy without forgetting its origins. It comprises a cohesive group of highly motivated people, who carry out their work with great passion, and are eager to convey this passion. Thus, the new generation is young, enterprising and attentive to the new trends of furniture industry and the market; an achievement that allowed us to march in step with progress and, to some extent, even further."

*Emiliana Colombo*  
CEO

"Nowadays the bed must satisfy a precise combination of quality and ergonomics, because there are different individual needs for support and comfort during sleep; this means creating intelligent solutions developed carefully and knowingly and characterized by a high level of style and craftsmanship, as well as the choice of materials and finishes, with the aim of achieving the optimal balance between these two terms of assessment."

*Cesare Citterio*  
R&D

"A good bed counts for much, but not all. We like to be pragmatic, certainly, but we also know that a product, even if excellent, is not complete until it conveys real feelings. How could we fail to be aware of this since this is the element that, more than any other in the house, is synonymous with pleasure and well-being? That's what pleasure becomes when it arouses emotions. So the bed becomes a valued and refined piece of furniture in such a way that it holds center stage, in the bedroom."

*Mara Citterio*  
Style

"We take the artisan passion that characterized erstwhile Italian craftsmanship in the world and associates it with the innovations brought by the new generation, thereby ensuring a comprehensive product and service, modern, constantly improved and with increasingly high quality standards."

*Sonia Pellicchia*  
Tailor's

# Materials

Orsa Maggiore proposes a range of anatomical support of superior quality, technically advanced and carefully designed to optimally meet the comfort, reliability and prestige requirements which are now most popular in bedding. Integrated pocket spring systems made of stainless steel combined with different compositions realized in natural origin biological foam, viscoelastic foam or latex; structures which follow the natural shape of the human body to ensure proper and adequate support.

# Outer fabrics

## Orsa Knit Modern - Orsa Knit Luxury

A collection that fascinates from the first glance. The mattress is the main character in the bedroom when the cosmopolitan charme becomes "de rigueur". The fabrics Orsa Knit Modern, pure, endearing and modish, and Orsa Knit Luxury, precious, gentle and timeless, overcome the traditional conception of the mattress cover we are usually accustomed to, creating proper "instant classic" from time to time.

But the look isn't an end unto itself: the incredibly silky and smooth feeling blends perfectly with the fabric's anti-pilling properties, and the many healthy qualities that come from the applied treatments.

Composition:

Orsa Knit Modern: 80% PL - 20% VI

Orsa Knit Luxury: 80% PL - 17% VI - 3% EA

## Anti-pilling

Anti-pilling fixing reduces the formation of linings and dots on fabrics and knitwear made of yarns which are prone to it due to their considerable length, flexibility and mechanical resistance, ensuring an unchanged quality through time.

## Aloe Vera

Aloe Vera emollient extract has long been valued for its healing benefits. It contains over 75 beneficial nutrients and 200 active compounds, and scientific studies have shown that when applied as a fabric treatment, Aloe Vera has a positive balancing effect on our sleep and well being. The perfect combination of natural softening, anti-bacterial, and eco-friendly properties comprise a perfect blend which makes Aloe Vera an excellent natural treatment.

### **Silver Clean**

Silver Clean has a safe bacteriostatic effect against a large number of gram-positive and gram-negative bacteria, including MRSA (methicillin-resistant *Staphylococcus aureus*) as well as some yeasts and micro-fungi. The high-tech functionality of Silver Clean effectively reduces the formation of odor caused by bacteria. It acts on the bacterial cell membrane, inhibits the functioning of the microorganism and interrupts the food chain of dust mites, resulting in a more hygienic and antiseptic fabric.

### **Feran Ice™**

Due to its permanent hydrophilic function Feran Ice produces a faster moisture transport on textiles. An improved moisture transport also means a better distribution of moisture on the surface, as a result, the evaporation performance of the textile increases and it dries much quicker, which is especially advantageous for hygiene. Since the moisture evaporates on the outside of the fabric, instead of on the skin, a pleasant cool effect arises.

### **Airnet**

Largely used in the pediatric environment, this special element is made entirely of antiseptic material, and can be found even in bedding application, being highly breathable, lightweight, elastic and non-deformable.

Technically, Airnet creates an "empty volume" which allows a considerable air recycle, ensuring the proper ventilation of the product at its inside.

Composition: 100% PL

SILVER CLEAN 

**FERAN ICE** 

# Padding

## Celliant™

Decades of development by leading experts in medicine, physics and biology, as well as a dedicated Scientific Advisory Board, led to the creation of a fiber loaded with a potent mix of thermo-reactive minerals. Powered by our own metabolism, like a hybrid engine it recycles and converts radiant body heat into infrared energy which gives vigor and vitality to the body.

The active minerals in Celliant™ are ground into particles smaller than a single micron, about 100 times thinner than a human hair, so millions of these minerals are extruded into a resin that is loaded directly into the core of the fiber. This process means Celliant™ technology lasts the lifetime of the mineral and it will never wash out or breakdown.

Infrared light is a natural occurring wavelength just outside the visible light spectrum and is widely recognized for having positive effects on the body. It is a medically proven vasodilator, which means it promotes circulation, increases tissue oxygen levels, enhances cell vitality and regulates body temperature.

Infrared light is commonly used by hospitals and doctors as a therapeutic treatment for conditions ranging from high blood pressure and congestive heart failure to muscle tears and rheumatoid arthritis.

Celliant used in bedding has been clinically proven to enhance the rest from sleep, with subjects falling asleep 15 minutes faster on average in a pilot study.

## Omnia Ingeo™

An unparalleled padding system which combines high breathability, high comfort and excellent freshness / heat balance, all in a wholly healthy and natural product.

Omnia Ingeo™ uses a unique blend of cashmere, silk, white linen and bamboo fiber, thermally bonded in a multilayer composition using Ingeo™, a plant transformation process that ensures a minimal environmental impact and a natural tactile feel. At the same time, Ingeo™ is a breathable and an hypoallergenic product, thus it doesn't retain odors, hinders bacterial proliferation then doesn't cause any allergic reaction.

### Cashmere

Cashmere region is spread between Afghanistan, India, China and Mongolia, where the "hircus" goats, known for their precious golden fleece are bred. Cashmere comes from the undercoat of these animals, and is made up of thousands of the most soft and finest fibers.

Cashmere coat is renowned for its lightness, its thermal properties and the pleasing, soft, silky feel that it gives to the touch.

### Silk

Silk is a protein fiber obtained from the sericulture from particular categories of Lepidoptera. It reflects light with inimitable brilliancy and easily absorbs the dyes with particularly richness of shades. Silk thread is particularly durable and elastic, and the simple contact with air allows it to keep unaltered its freshness, hygroscopic and thermal insulation properties.

### White linen

White linen is the oldest textile fiber in the world: comfortable, suitable for any season, insulating in winter and fresh during summer, it regulates body temperature and is healthy for skin, it is delicate and soft thus is hypoallergenic and antibacterial. The particular morphology of its fiber gives the product high hygroscopic features which allow immediate absorption and evaporation of liquids: this results in a pleasant feeling of freshness and comfort.

### Bamboo

Bamboo fiber is farmed in mountain crops free from pollution and pesticides with processing techniques which have a minimal environmental impact. Thanks to its hollow structure, it has excellent breathability and insulation qualities, along with antibacterial and natural deodorant benefits; this fiber also contains pectin, which gives emollient, regenerating and nutritional properties.

### Soft Foam

Due to its low density, this particular polyurethane is characterized by an unusually soft feel and an extraordinarily muffling consistency, finding its natural use in quilting and topper applications.

# Inner structure

## Gaia® - foam

A name from ancient origins and illustrious paternity what the English scholar James Lovelock chose in the late 1960s to define his interpretation of Earth as a living system that breathes and evolves: Gaia, the goddess of Earth in Greek mythology.

Gaia® consists of water, raw materials derived from renewables such as soy-bean, whose fatty acids are involved in the regeneration and water balancing of the skin, and a mix of essential oils - extracted from officinal herbs such as chamomile, cypress, lavender, salvia officinalis, neroli and so on - which give health to the skin, as in cosmetics, providing energy and focus, so being beneficial for the body and mind, representing the natural coacuvant ideal to improve the quality of rest.

## Dryfeel®

Dryfeel® is designed to offer a completely open cellular structure that allows a complete moisture transport, a quick and effective drainage which ensures maximum comfort and breathability. It is a different type of foam specifically developed to have high support properties despite the high porosity of the material. Moreover it is treated with biocides which destroy harmful organisms such as bacteria, molds and fungi.

## Gaia® - viscoelastic foam

The natural and beneficial properties of Gaia® merge with the amazing balance between support and softness of viscoelastic foams.

While this foams molds around body shapes thanks to its high thermal sensibility, absorbing and distributing bodyweight gradually and evenly minimizing pressure points, the blend of natural renewables and essential oils improves the regeneration and water balancing of the skin, giving vigor and vitality to the body and mind.

### Latex

Extracted from Hevea Brasiliensis in Asian tropical forests, the most precious natural latex qualities are used in the production of ergo-anatomical supports, becoming the ideal material for those who want to sleep naturally. Soft, hygienic and hypoallergenic, it is bactericidal and germicidal, while the intercommunicating air microcells that draw the structure of the blocks allow a good internal air recycle, making it fresh and self-ventilated.

### Molle indipendenti

Pocket spring was the real revolution in bedding, years later it still wonders. New supporting systems, increasingly advanced and sophisticated, are made with differentiated bearing zones making the whole structure considerably more accurate to body and weighing stresses on the surface. The range of supports, so the application possibilities, is further extended thanks to the use of springs with different height, size and stiffness, to reach higher standards of compression ratios and ergonomics.

The combination of different types of springs led the creation of Pocket Pyramid, an integrated system of superb and unmatched support and ergonomics qualities; Orsa Maggiore also features the exclusive Cotton Pocket spring, where the spring pockets are made of pure cotton which has a better noise absorption than the classic non-woven fabric providing a rather natural feature to the finished product at the same, so a remarkable luxury.

	Type	Class	Density spring/sqm	Bearing surface supporting areas	Pockets	Spring technical details		
						Diameter mm	Wire section mm	Height mm
Cotton Pocket	pocket spring	800	300	7	Sound-absorbing pure cotton	60	1,8/2,0	140
Supermicro 3000	pocket spring	3.000	1.100	7	Hypoallergenic non-woven fabric	28	0,9/1,0	140
Pocket Pyramid	pocket spring	10.000	3.080	7	Hypoallergenic non-woven fabric	28/30	0,9/1,0/1,0	195

# Covers

Clear lines, sober colors, elegance of the object: a unique aplomb.

"Elegance is not about being noticed, it's about being remembered."

Inspired by this famous quote, Orsa Maggiore designed a line of coverings characterized by sophistication and authenticity of design, which doesn't want just to capture fleeting looks but wishes to stimulate the imagination of people to make them live the night in its deepest sense. So called night.

### Orsa Maggiore embroidery

As an artist who signs his canvas, all Orsa Maggiore products are finished with an elegant embroidery, emphasizing the exclusivity and care of details of our products.

### Exclusive features

Orsa Maggiore was born watching the sky at night. What more poetic homage to put on our products the same stars which inspired us?

### Topper Bed and Top Comfort

The thick ribbon used for eCing is a vivid reference to the most classic tradition of mattress manufacturing; The pillow top seems float on the product, emphasizing its comfort and coziness qualities.

### Fast Strap®

Orsa Maggiore's Topper Bed comes standard with Fast Strap®. A patented system consisting of elegant straps placed on the four sides which allow the hooking and fastening of the topper onto the mattress through a simple and intuitive operation.

### **Twin Set**

Orsa Maggiore mattresses are available on request with an additional and interchangeable cover for the seat, allowing the user to sleep on mattress normally covered while washing and sanitizing the just used cover.

### **Removable cover**

The practical zip that runs along the perimeter of the mattress allows the cover to be removed and is available on all Orsa Maggiore models on both sides. Once the product is unlined, the cover can be washed as indicated by the labels applied to the product.

### **Breathable fascia and exclusive details**

The perimeter fascia with the exclusive contrast piping is equipped with handles - for a more practical use of the product while moving - and are designed for the application of Top Comfort. The Airnet high breathability inlay improves air recycling within the product allowing a faster dispersion of heat and moisture, therefore a better hygiene.

OrsaMaggiore

## Avantgarde

A making designed to suit the needs of those looking for an entirely allergy-resistant and innovative cover, and is excellent as far as comfort and required characteristics are concerned. The soft touch of a fabric that cleverly combines Aloe Vera's emollient qualities with the antibacterial properties of silver, coupled with one of the most technically advanced padding available today: Celliant™ is invigorating and revitalizing thanks to its mix of thermal-reactive minerals which turns body heat into infrared energy. Matched with the high breathability of Airnet and the effective practicality of the removable cover with double zip, Avantgarde represents the perfect synthesis between comfort and functionality. The formal rigor of everyday well-being.

## Prestige

Recreate an ambience which is balanced, anti-static and philosophically in equilibrium. Able to do so with a few simple elements which nature itself has given us: Omnia Ingeo™ is made of a pure natural blend of cashmere, silk, white linen and bamboo; A fine padding which provides a rich and delicate volume. A thick rich thread refined to the touch defines the wefts of a bright, noble knit fabric, enriched with treatments as Aloe Vera for a superior softness and natural hypoallergenic properties, and Feran Ice® which ensures a constant freshness of the product. The removable cover, with zips on both sides, is finished with the breathable Airnet inlay.

Intimate and intense. Man in harmony with the environment around him, and with himself.

Orsa Maggiore

A high-angle photograph of a white, tufted mattress resting on a light-colored wooden floor with a herringbone pattern. The mattress is positioned diagonally across the frame. A semi-transparent white text box is overlaid on the center of the mattress. The text box contains the title 'Topper Bed' in a large, elegant, black cursive font, followed by three paragraphs of smaller, black, sans-serif text.

# Topper Bed

The perfect integration in the product design thanks to the patented Fast Strap® system, which brings elegance to simplicity. The shape of your body is delicately enclosed by the excellent coziness and gentle support of Soft Foam polyurethane.

The excellence in craftsmanship and technique which stands out through the details of finishing and uniqueness of materials such as Celliant™ - restoring and invigorating padding due to infrared energy - and Omnia Ingeo™ - a fine natural wadding blend - and eclectic and refined fabrics further characterized by sophisticated treatments.

Escaping from the ordinary sometimes means being a class apart.

# Models

Meeting the anatomical needs of people optimally: this is, in short, the purpose of the mattress today. Cozy ergonomics, a properly distributed pressure, progressive and homogeneous support with calibrated flexibility ratios and an overall high technical level. Everything is quantifiable with cold numbers because the pragmatic aim is to achieve the excellence in physiological comfort.

But once lie down, sensations become protagonists.

## Biome Line

### N080 - Aster

The 7 weight-bearing zones supporting capacity Cotton Pocket spring – with pure cotton spring pockets – is enveloped inside a natural-foam polyurethane Gaia® ergonomic box system – made with essential oils foaming – and with high breathability Dryfeel® medium: qualitatively unexceptional, anatomically harmonious.

A significant step in the modern conception of sleep, essence distilled into an object of superior class.

- 140 mm Cotton Pocket spring, 7 weight-bearing zones supporting capacity, pure cotton spring pockets
  - Spring count: 300 springs per sqm
  - Contoured, high density, polyurethane foam perimetral structure
  - 10 mm Dryfeel® high breathability polyurethane upper and lower medium

## BRF - Polaris

A functional bed with essential and elegant lines. A product with a genuine silhouette which can lend itself to any type of room and furnishing. The headboard draws the sleek and solid lines, and is available in different heights and finishing.

Equipped with wooden bedstead, it can be matched to any kind of mattress.

## BRF - Polaris

- Plywood structure with mdf compound crosspieces
- Polyurethane foam and interliner-coupled velveteen
- Wooden bedstead base
- Decò melange or Ascot double-face quilt fabric cover

## Headboard

- Plywood structure
- Polyurethane foam and interliner-coupled velveteen
- Available in 110cm height with plain fabric finish or in 150cm height with quilted cover
- Decò melange or Ascot double-face quilt fabric cover

## SBR - Nuit

A solution that melts tradition and design. This rigid-base bed is the ideal platform for mattresses with greater comfort and ergonomics, from which could be get the maximum performance they were developed for. Nuit can be provided as sommier or equipped with upholstered headboard, available in different heights and finishing.

OrsaMaggiore

Warning: some product shown could be not included in the collection.  
Please consult the color chart to check the availability

## **SBR - Nuit**

- Plywood structure with mdf compound crosspieces
- Polyurethane foam and interliner-coupled velveteen
- Rigid flat-base
- Orsa knit fabric, Airnet tricot, Decò melange or Ascot double-face quilt fabric cover

## **Headboard (on request)**

- Plywood structure
- Polyurethane foam and interliner-coupled velveteen
- Available in 110 cm height with plain fabric finish or in 150cm height with quilted cover
- Decò melange or Ascot double-face quilt fabric cover

## WBL - Continental

The superior flexibility of the TPE-E compound is the main feature of the slat support of this bedstead. Although in a bed with a traditional configuration, you can achieve an extraordinary level of comfort. Continental is suitable for those who require particular shock absorbing on the entire bearing surface, and have orthopedic, muscular, circulatory or overweight needs, thus are oriented to premium quality bed-bases.

- Beech plywood frame, 70x25mm, natural finish
- Beech plywood slats, natural finish
- TPE-E suspension junctions
- Midline reinforced with lower third slat and stiffness sliders with TMS system
- Fiberglass corners with SEBS junction
- Grey oak or dark oak finish (optional)

## WBE - Atlantique

Atlantique sets new standards in fitment and stress-response among high tech - top quality bedsteads. The whole bearing surface is composed of plate elements which create a plain and solid platform, supporting the mattress perfectly and harmoniously. These supports - positioned on the bedstead side by side -are individually adjustable, emphasizing the accuracy of the system.

- Beech plywood frame, 70x25mm, natural finish
- Beech plywood slats, clay finish
- TPE-E suspension junctions with ABS slat dampers
- TPE-E suspension elements, ABS plates with integrated TMS system
- Fiberglass corners with SEBS junction
- Grey oak or dark oak finish (optional)

## Gaia<sup>®</sup> viscoelastic foam pillow

Thanks to a low level of resilience, and particular slow-shaping comfort, this is one of the most suitable materials to be used for supporting the neck and head during rest. It supports the cervical column correctly and excellently, avoiding muscular contractions in the neck not pressurizing any area of the body, thereby it avoids pins and needles and pain arising from mistaken postures.

**Available both in classical and anatomical versions -**

- Classical or anatomical contour
- 150 mm (classical) or 120mm (anatomical) Gaia<sup>®</sup> viscoelastic foam supporting structure
- Orsa Knit Modern o Orsa Knit Luxury cover, cotton jersey under-lining

dry clean

Cool iron,  
max 110°-230° F

## Latex pillow

Distinguished by its natural ability to reassume its original form after being subjected to pressure or stretching, latex is one of the best materials for pillows. Extremely comfortable, it easily adapts to any shape without altering its initial properties.

**Available both in classical and anatomical versions -**

- Classical or anatomical contour
- 150 mm (classical) or 120mm (anatomical) latex supporting structure
- Orsa Knit Modern o Orsa Knit Luxury cover, cotton jersey under-lining

Tested for harmful substances according to Oeko-Tex® Standard 100

## Feather pillow

Goose feathers, the most highly valuable, have a physiological elasticity to compress and expand. Due to this feature feather traps air, resulting both soft and warm at the same time. In addition, this is an hydrophilic material: it removes body moisture and releases it when aired, thereby offering a constantly dry and comfortable ambience.

- Classical contour
- Goose/duck feathers wadding, 1200 gr
- High textured Percale pure cotton fabric cover

## Kapok pillow

Kapok is a natural fiber produced from the fruits of the Ceiba Pentandra, a tree widespread in South America. The fruits of this majestic tree –that can reach over 60 meters in height – were considered in ancient time one of the sacred symbols in Mayan mythology. The soft and light fiber of kapok gives great softness to fabrics and padding of pillows and mattresses, it provides excellent moisture management besides being long-lasting, organic, sustainable and eco-friendly.

- Classical contour
- Pure kapok wadding, 1000gr
- High textured Percale pure cotton fabric cover

## Cotton pillow

Cotton is a natural fiber, both soft and resistant and is characterized by a high level of moisture absorption. Cotton fibers - being hollow inside -work as thermal insulator, avoiding heat accumulation during summer, and its dissipation in winter.

- Classical contour
- Cotton blend wadding, 1000 gr
- High textured Percale pure cotton fabric cover

## Mattress cover

The ideal solution to guarantee protection of the surface of the mattress support; easy to use owing to the pure cotton elasticised band.

- Pure cotton terry-cloth with perimetral band
- Bonnet design, made-to-measure

## Bedstead cover

Placed between bedstead and mattress, this protects the latter from dust and dirt from the floor, and its movements on the bedstead, thereby avoiding - apart from unpleasant stains and marks, also ladders and tears.

- Pure cotton terry-cloth quilt with perimetral band

## Pillowcase

Pillow cases are the ideal solution to make the surface of the pillow more hygienic, ensuring better protection; easy-to-use and machine-washable.

- Pure cotton fabric with zip

## General comments and rules of use

If treated with care and attention, your Orsa Maggiore products will retain their quality and excellent performance for longer.

### **Spring, latex and foam mattresses**

The choice of a suitable mattress is an entirely personal matter and a question of personal feelings; we therefore suggest you dedicate a lot of time to choosing this very important support.

You are advised to turn the mattress round and upside down seasonally in order to get the best aeration. This precaution also ensures less wear of the mattress, and more evenly balanced at that, and this helps the product to last longer. Keep the product away from pointed or sharp surfaces in order to avoid damaging the cover of the product irreparably. And in order to avoid depressions and anomalies in the product's supporting structure, avoid using it with metallic mesh bedsteads.

For product with removable and washable cover, we recommend to follow carefully the washing instructions indicated on the product label, in order not to damage colours and integrity of textiles and padding used.

In order not to damage the spring structure irreparably, a spring mattress must never be rolled up or folded. If it needs lifting or moving for any reason, it should always be kept in a horizontal position. If ever put on one end, it should not stay in this position for any length of time otherwise the size and shape of the product could undergo a change. Avoid hitting it violently, or jumping on it, especially if the underlying support is a bedstead with wooden staves.

A latex mattress must never be exposed to the direct sunlight or to heat sources; and it must never be folded or rolled up. It should be turned round and upside down seasonally in order to guarantee the best aeration possible, so that any moisture absorbed during use is dispersed. A latex mattress should be placed on a bedstead with staves, or another surface permitting air to flow around it; avoid using it with a bed which has containers underneath.

The adaptability of Memory Foam visco-elastic polyurethane means it is suited to any kind of bed or bedstead. Foam mattresses offer the user a better way of handling the product, anyway we suggest a periodical rotation of the mattress in order to avoid to stress excessively the same areas of the bearing surface, so the supporting structure: although made of avant-garde and non-deformable materials, foam products suffer from improper use over a long period of time.

### **Bed-bases and other supports**

Regardless of the bed used, we strongly advise you to avoid violent impacts (such as jumping on the bed) and/or overload localized areas of the bearing surface in order not to damage the flexible parts (staves) and the whole underlying support structure.

Bedstead lifting mechanisms are manual or automatic. We strongly recommend the correct use of the product in order to guarantee the proper support and to avoid sagging in the support which could lead to injury, possibly serious. The manufacturers accept no responsibility for personal injury or other consequences, possibly serious, resulting from personal negligence and/or incorrect use of the product.

If the product has a removable and washable cover, follow the washing instructions on the product label very carefully in order not to damage the colours and integrity of the textiles and padding used. Keep the product away from pointed or sharp surfaces in order to avoid damaging the cover of the product irreparably.

### **Accessories**

Pillows and accessories in general require less maintenance than other products of the bedding sector, anyway some attention to them is necessary.

We recommend that the product is aerated when not being used to guarantee correct aeration and the dispersal of moisture absorbed during use.

Keep the product away from pointed or sharp surfaces in order to avoid damaging the cover of the product irreparably.

If the pillow has been vacuum-packed, after removing it from the packaging leave it for around ten hours before using it so that the product can attain its permanent dimension.

If the product has a removable and washable cover, follow the washing instructions on the product label very carefully in order not to damage colours and integrity.

As for the mattresses, the latex pillow must never be exposed to the direct sunlight or to heat sources, since this would damage the product' structural integrity.

The choice of a suitable pillow is an entirely personal matter and a question of personal feelings; we therefore suggest you to dedicate enough time in choosing this very important support.

## Conditions of guarantee

Only for products with the Orsa Maggiore label. Orsa Maggiore is a brand of T.S.C. srl.

**Additional rights.** For consumers benefiting from consumer protection laws in the state where the product was purchased or, if different, in the state of residence, the benefits acquired under this guarantee should be considered supplementary to the rights provided for by those consumer protection laws. This guarantee does not exclude, limit or suspend any such right arising from non-compliance with the sales contract. The above limitations and exclusions do not apply to consumers of countries, states or provinces which do not allow the exclusion of or limitation of accidental damages or accessories or the limitation of the duration of guarantees or implicit conditions. For this reason, the limitations and exclusions indicated below shall not apply. This guarantee confers specific rights on the consumer, as well as those which he/she may enjoy under the law of his own country, state or province. This limited guarantee is governed by the laws of the country in which the purchase was made. T.S.C., that is the conferrer of this limited guarantee, is identified at the foot of this document depending on the country or region in which the product was purchased.

**Guarantee.** T.S.C. guarantees its products, including spring mattresses, latex mattresses, foam mattresses, upholstery, bedsteads, complementary products, bed linen and other accessories of the brand Orsa Maggiore brand for 2 (two) years from the original date of purchase by the final user. If a defect should become evident and a valid claim is made within 180 (one hundred and eighty) days from the date of the original purchase, T.S.C., at its own discretion, and to the extent permitted by applicable statute, shall (1) remedy the defect free of charge by using new or reconditioned components which have the same function and performance as new components, (2) replace the product with a new product or a reconditioned product which has the same function and performance as the new components, and whose performance is, at a minimum, equivalent to that of the original product, or (3) reimburse the purchase price of the product. If no objective assessment is possible, any costs incurred to ascertain the damage shall be at the client's expense. T.S.C. also reserves the right not to recognise the guarantee if the product has been tampered with after purchase, and this shall be understood as including failure to adopt normal precautions for use and maintenance indicated below. If such conditions should apply, repairs or replacement necessary shall not be included in the guarantee and their cost shall be communicated to the consumer, who shall be free to accept or reject the conditions proposed by T.S.C. T.S.C. reserves the right to request the consumer to replace defective parts with new or reconditioned parts, which can be installed directly by the user, and which are supplied by T.S.C. under the guarantee. T.S.C. shall guarantee the products or parts thereof used as substitutes, including those installed directly by the user in conformity with instructions supplied by T.S.C., for the longer of the remaining period of the guarantee of the original product and 180 (one hundred and eighty) days from the date of replacement or repair. After replacement, the substitute product or part shall become the consumer's property and the substituted product shall become T.S.C.'s property. Parts supplied by T.S.C., in accordance with its guarantee obligations, must be used as part of the product for which the service under guarantee was requested. When a reimbursement is made, the product for which the reimbursement was made must be returned to T.S.C. and shall become T.S.C.'s property.

**Exclusions and limitations.** This limited guarantee shall apply solely to products manufactured by or for T.S.C. which are identified by the 'Orsa Maggiore' brand, sales or logo name, printed on them. This limited guarantee shall not apply to third party products, even if supplied or sold together with T.S.C. products. Producers and suppliers of goods and services different from those of T.S.C. may provide their own guarantee to the final user, but T.S.C., within statutory limits, shall supply third party products without any guarantee. T.S.C. is not responsible for damages caused by failure to observe the instructions regarding how to use the product.

**This guarantee shall not apply to:** (a) aesthetic damage, such as scratches, tears and breakages, unless the problem has been caused by defects in manufacture or by the workforce; (b) damages caused by use in

association with products which are not T.S.C. products; (c) damages arising from accidents, abuse, improper use, contact with liquids, flooding, fire, earthquake or any other external cause; (d) damages caused by the use of products in a manner not complying with the uses indicated by T.S.C.; (e) damages caused by work (including work of improvement or enlargement) carried out by any individual other than T.S.C. or a representative of T.S.C.; (f) products or components which have been modified in order to alter their functioning or capacity, without the written permission of T.S.C.; (g) defects which can be attributed to ordinary wear and tear of the product, or otherwise due to its normal ageing; (h) order errors, such as size, finishing, models.

Within legal limits, this guarantee and the remedies indicated above are exclusive and replace any other guarantee, remedy or condition, whether verbal or written, legal, explicit or implicit. Within the limits of applicable law, T.S.C. specifically denies any legal or implicit guarantee, including but not restricted to guarantees of commercial possibility or suitability for specific purposes or because of hidden or latent defects. If T.S.C. is not permitted by law to deny the above-indicated legal or implicit guarantees, their duration shall be understood as being limited, to the extent permitted by law, to the duration of the explicit guarantee or service of repair or replacement offered by T.S.C. at its discretion.

Retailers, agents and employees of T.S.C. are not permitted to effect modifications, extensions or additions to this guarantee. If any of the conditions of this guarantee are declared invalid, void or inapplicable, the remaining conditions shall be considered still valid and effective.

Without prejudice to this guarantee and up to the maximum limits provided for by statute, T.S.C. shall not be responsible for direct, special or indirect damages or accessories arising from violation of the guarantee or its conditions, or those provided for by any other legal principle, including, without limits, loss of ability to use, financial interruption, loss of effective or anticipated use (including the loss of contractual profits); loss of liquidity; loss of expected savings; loss of business; loss of opportunities; loss of goodwill; damage to image; or any loss or indirect damage or accessory regardless of the clause. The above limitations shall not apply in the event of a claim for death or personal injury nor to the legal liability for intentional negligence, culpable error and/or non-performance. T.S.C. specifically does not guarantee that it shall be able to repair every product covered by this guarantee.

**How to use the guarantee.** T.S.C. guarantees all of its products – as specified below – only and exclusively if the strip attached to the product is returned to the manufacturer (the original, via normal mail) duly filled in 30 days from the date when the goods were received.

To request assistance under the guarantee a request must be sent by post/fax/email, attaching a copy of the purchase document, and specifying the reasons for the request and if necessary photographs showing the defect.

Once authorisation has been obtained from the manufacturer, the product must be sent to it to be inspected so that the defective parts can be ascertained, and it must reach the manufacturer's premises perfectly packaged to avoid any further damage. Transport costs to the manufacturer's premises shall be at the expense of the consumer, while T.S.C. shall send the product under guarantee back to the consumer afterwards.

The type of service, availability of components and response times may vary depending on the country in which the service under guarantee is requested. The type of service offered may be changed without prior notice. If the service under guarantee cannot be effected in the country where the consumer requests it, the costs of delivery and labour may be charged to the consumer. If the service under guarantee is requested in a country other than that in which the product was originally bought, the consumer shall be responsible for ensuring that all laws and regulations regarding import and export shall be observed, and shall be liable for customs duties, value added tax and all other taxes.

**Privacy.** T.S.C. shall keep and use client information in accordance with its privacy policy, and in line with statutory obligations in this matter. This guarantee in no way replaces the consumer's statutory rights as indicated in EU directive 99/44 and confirmed nationally. Any dispute regarding this contract shall be judged by the Tribunal of Monza.
