I Our values

All in the name of quality,
from the small details to
the big picture.

Since the day it was founded in 1976, the Ellevi Group has been putting Made-in-Italy values into practice, combining decades of craftsmanship with cutting-edge production methods and technologies in different industries.

We're pioneers in the world of ship furnishing, a leader in refurbishing, and now also active in the high-quality furniture sector via the VITOLUPO brand.

Logistical efficiency, advanced technology, sophisticated designs and a custom-made approach embodied in the characteristics of each project come together to satisfy our clients in all aspects of the contract sector.

“We combine attention to detail and aesthetics with flawless logistical organisation.”

II Experience

We believe a great future is ahead of us, built upon a great past.

The Ellevi Group has solid roots. We launched our business over 40 years ago, producing furniture destined for wholesale.

Year after year, our experience continued to grow, expanding into new areas. We began to provide furniture for offices, hospitality structures and the boutiques of the world's most prestigious brands, turning what was once a small artisan workshop into a successful, cutting-edge group of companies.

Starting in the 1990s, we began to specialise in the refurbishment of cruise ships, overcoming the challenges imposed by tight deadlines and stringent logistical needs.

It is therefore no coincidence that we've become pioneers in logistics and management, from the introduction of tailored software to production techniques that make it possible to work while the ship is in operation. Our work teams are trained

to ensure the world's highest qualitative standards and some of the fastest delivery times in the industry, guaranteeing meaningful economic benefits to our clients.

Over the decades, we've never stopped innovating in terms of means and methods, growing along with market evolutions.

Today, in addition to the Nova Milanese headquarters, we have offices in Miami and London, and we operate around the world, overcoming increasingly complex challenges with efficiency and absolute quality, no matter the context or client.

III Ships

We confidently navigate complex projects.

Since the early 1990s, Ellevi Group has successfully worked in the ship refurbishment industry, especially when it comes to large cruise ships.

We're experts in the field of cabin retrofitting, where we combine quality with the ability to work on a massive scale.

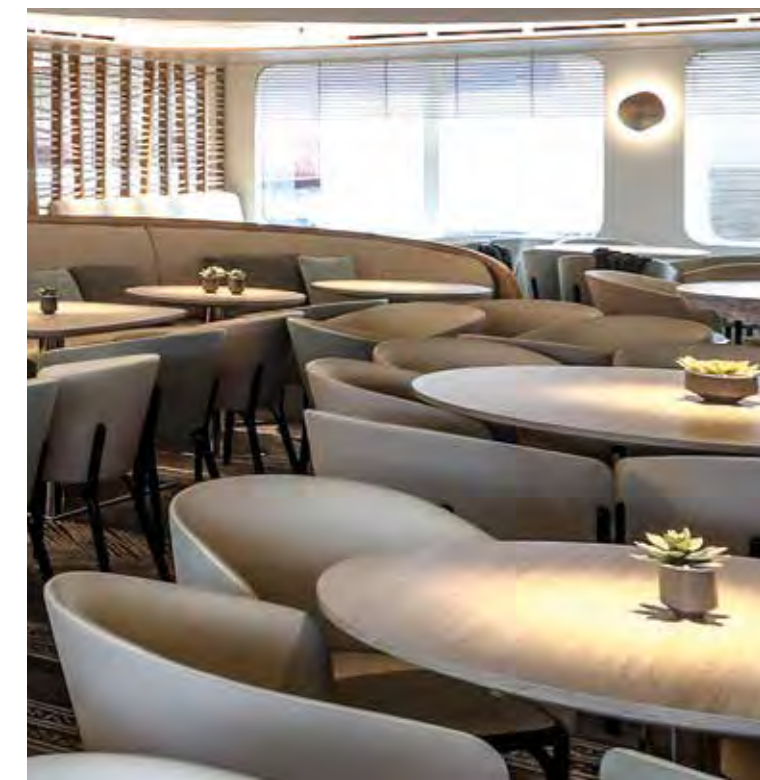

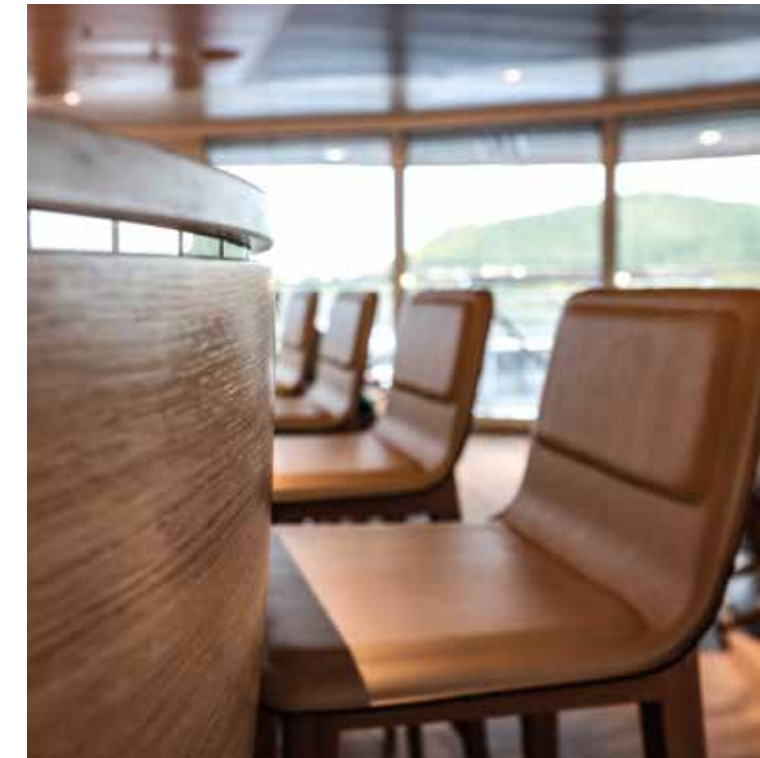

We've even renovated over 1,300 cabins, partially with the ship in operation, thanks to our 'Cabins on the run' logistical plan.

We also have had unparalleled success in projects involving the refurbishment and new construction of spaces open to the public, such as restaurants, open decks, atria, shops, cafés, casinos and transit areas.

Of course, none of this would be possible without a highly-specialised design team, able to provide their competence and skill in project management, from the resolution of interferences with the hull and on-board systems, to their integration with the furniture.

From dry dock activities to those carried out while the ship is in operation, we are experts in the management of complex projects, with logistical solutions and techniques that optimise installation times.

The challenges we've successfully navigated have helped us become increasingly responsive and precise in our mission to create high-quality, welcoming spaces on the world's most prestigious cruise ships. It is therefore no surprise that the world's most important shipowners and shipyards seek out our services.

IV

Hotels • Offices • Retail Residential • Public Spaces

Rooms where form and function come together.

Ellevi Group also effectively operates in industries where elegant results must be combined with superior quality work.

In these sectors, our design and organisational capacities, combined with impeccable logistics, have given us an important competitive advantage, delivering turnkey products and installations to our clients.

HOTELS

We know how important it is to combine style with efficiency. We're experts in the creation of refined rooms and spaces, executing the project quickly while respecting the original design.

OFFICES

We create all the different parts required by today's offices, like wall coverings, custom doors, furniture and accessories, special false ceilings, entry and reception areas, and meeting rooms.

RETAIL

Retail is a pillar of Ellevi's growth over the years. We consistently deliver commercial projects that are of notably high quality, both for the materials used and the end results.

PRESTIGIOUS RESIDENCES

Our experts satisfy every demand and meet every requirement, both architectural and functional, thanks to our ability to provide exclusive furnishings, prized materials and custom designs. In addition, our group includes companies that specialise in exquisite loose furniture, bringing unrivalled quality to every project.

PUBLIC SPACES

We have the skills necessary to operate in areas like airports, universities, train stations and international headquarters, creating pleasant, usable spaces.

We work with architects and designers to make their ideas a reality through effective manufacturing solutions that guarantee deadlines and quality expectations are met.

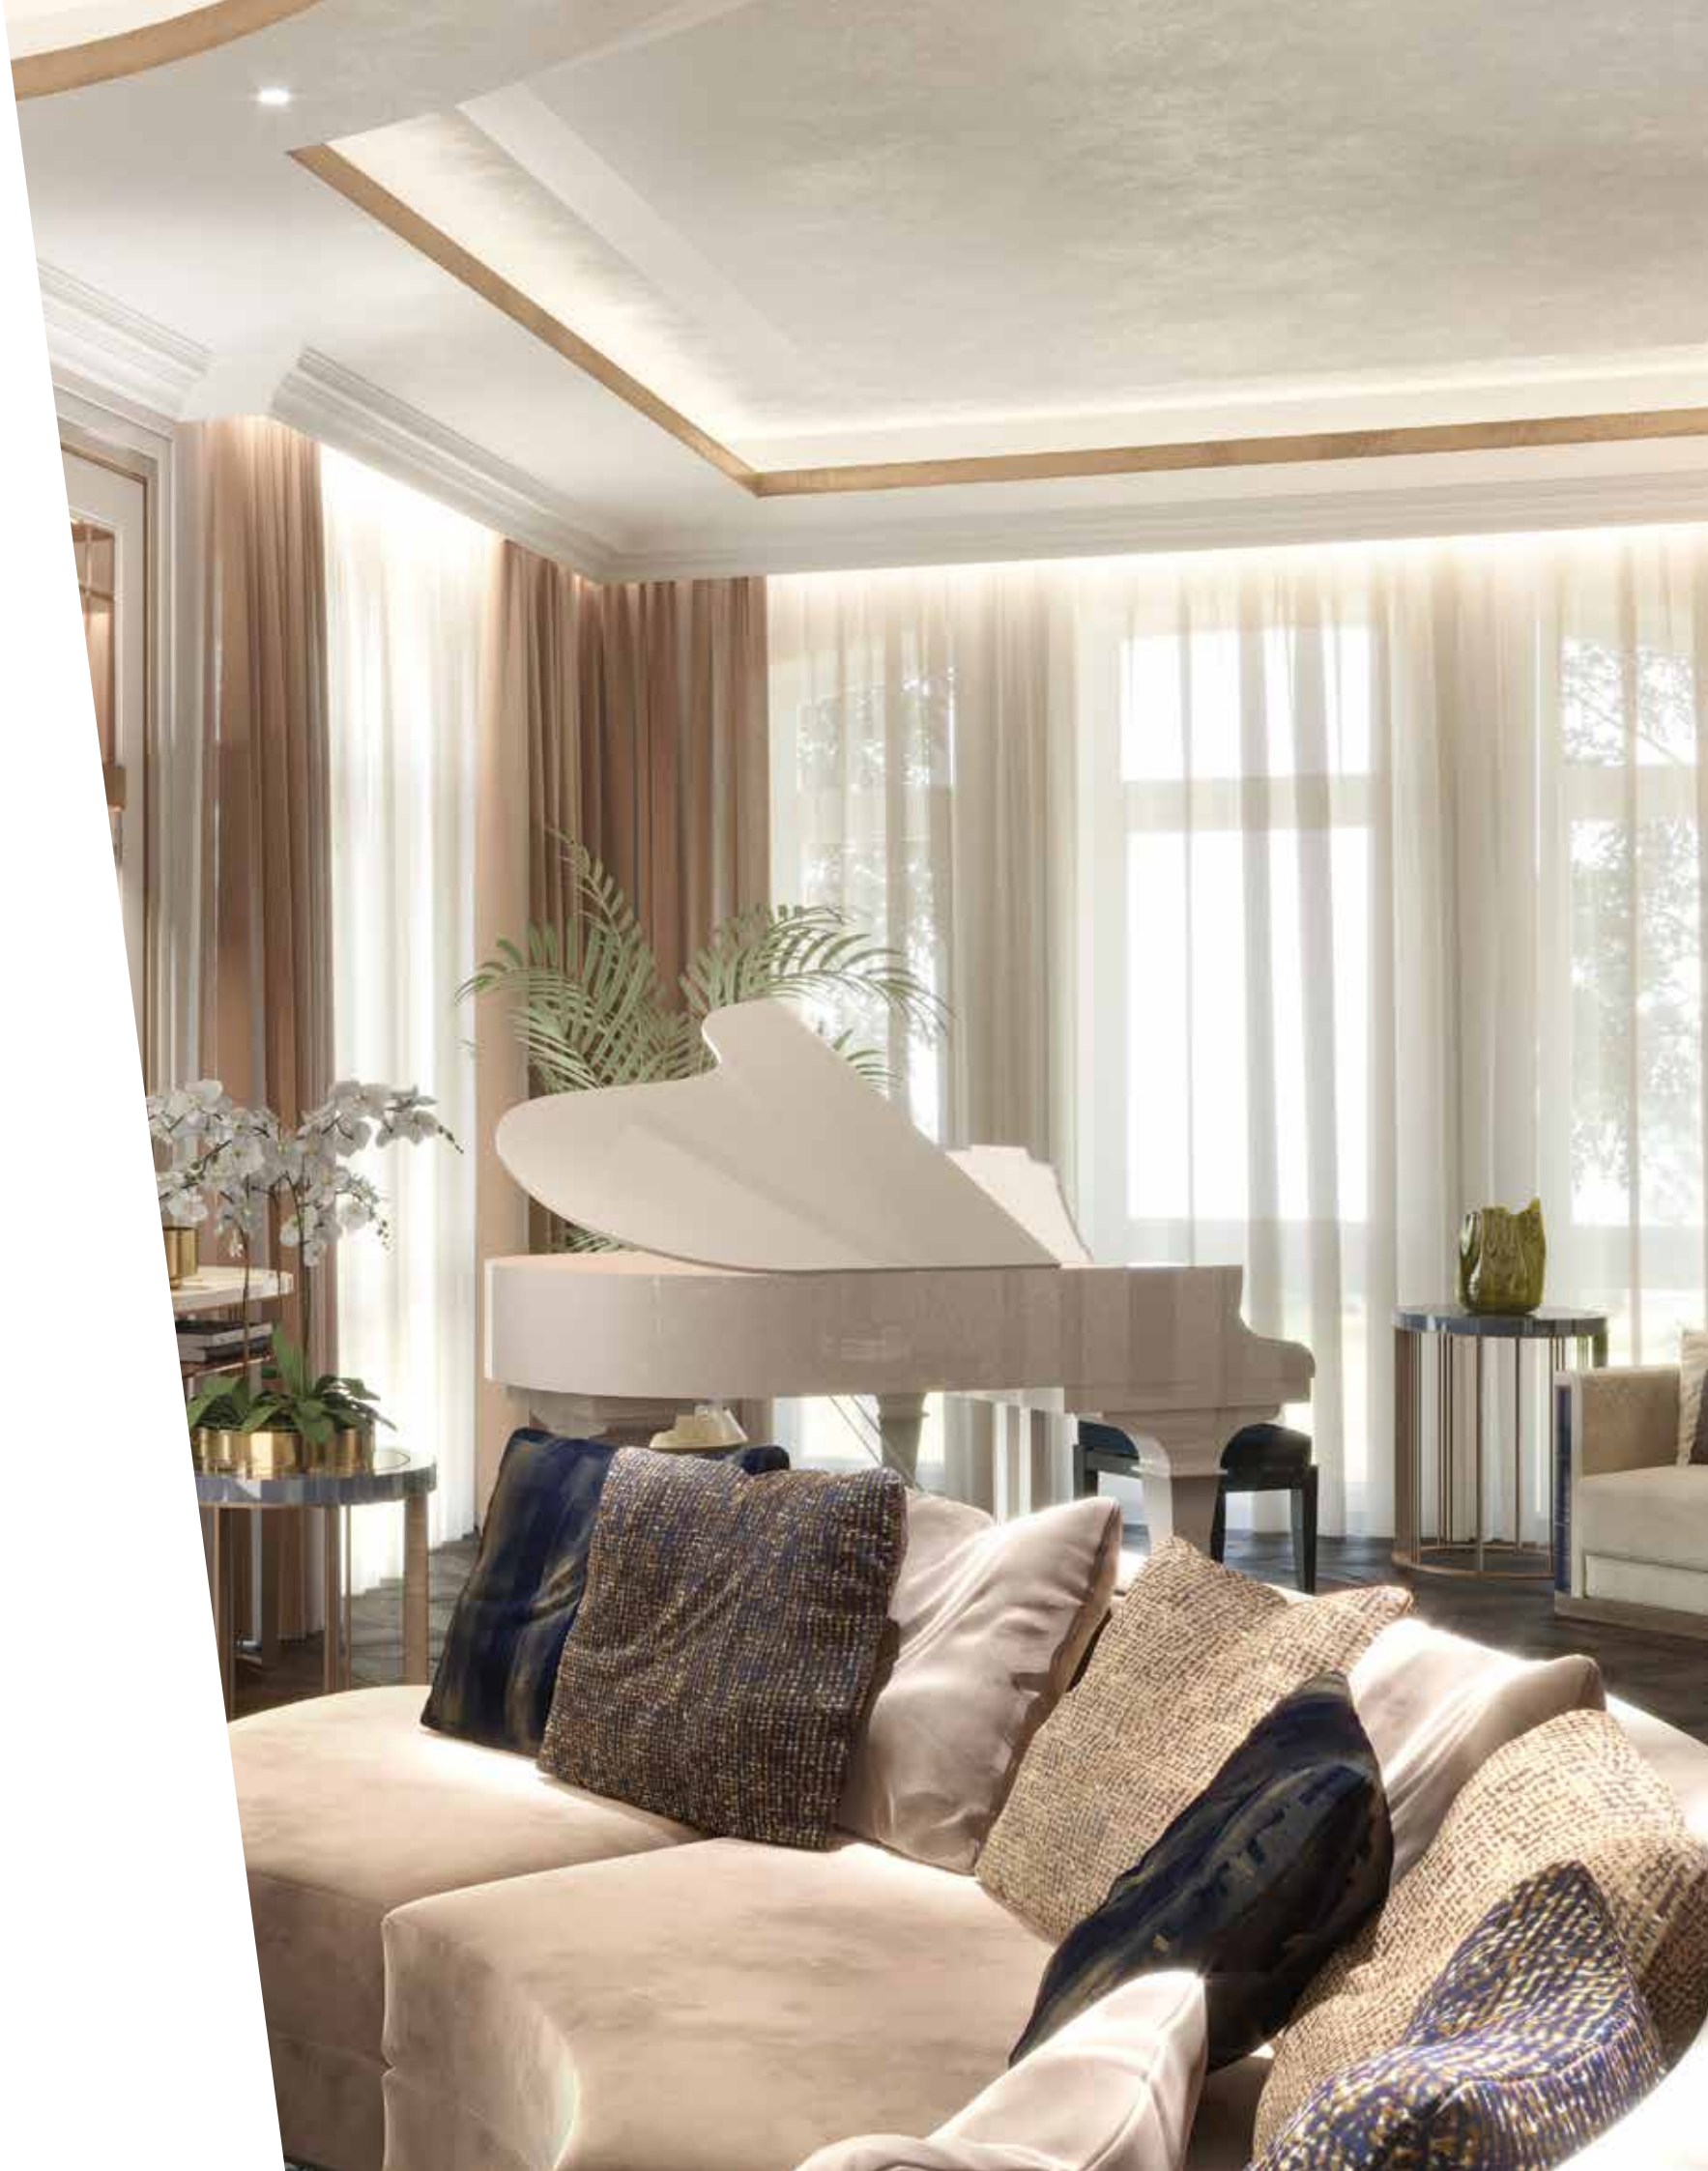

V Excellence

True quality should be everywhere,
even in the smallest details.

Customers who demand perfection inspire us to continuously improve.

In the refurbishment of prestigious homes, we have successfully faced the challenges that derive from elite projects to offer prized materials, impeccable finishes, unique details, creative solutions, and a taste for beauty complemented by our entirely Italian aesthetic.

Our ability to bring a 'Made-in-Italy' touch to each project truly shines in the creation of exclusive furniture, making each one a unique, hand-crafted, entirely-customised piece shaped by ancient expertise, exported with pride around the globe.

VI Locations

Find us in all four corners of the world.

Our headquarters is in Nova Milanese, near Milan, in the heart of the design manufacturing district. In our production facility, professional synergy integrates with the company's value chain.

We have two sales offices (Miami and London), and a plant in Satu Mare, Romania, where specialised workers process fibreglass, essential to the creation of pre-fabricated wet units.

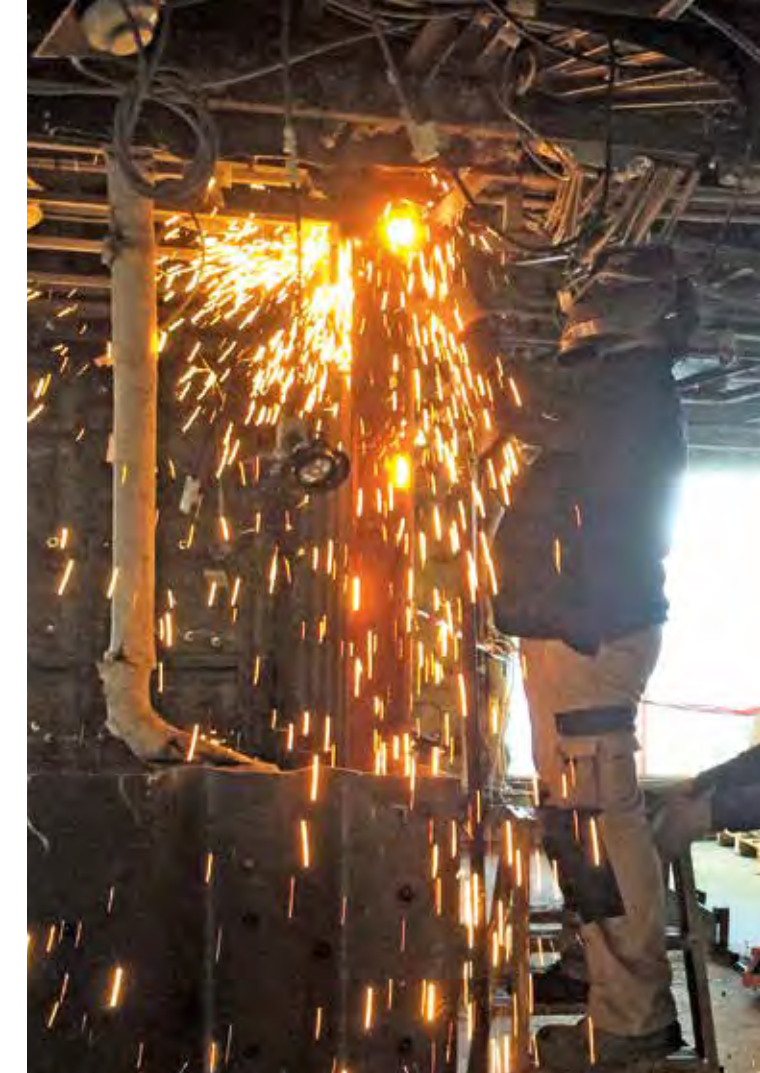

A dense network of contacts and partners around the world ensures professionalism in every situation.

VII Skills and creativity

We're well versed in the Italian art of inventing the way to beauty, day after day.

We bring added value to any project by consistently finding a way to guarantee utmost quality while meeting deadlines. Thanks to years of experience and the in-depth skills of our staff, we respond quickly to every request, from the initial price quote to the day we deliver the final product.

Overseeing all work phases
– from purchases, procurement,
warehouse management,
transport and maintenance –
allows us to better respond to
unforeseen events and to be more
flexible and responsive, never
sacrificing the attention to detail
that Made-in-Italy goods are
known for.

VIII Specialisation

Our clients place their trust in us because we're attentive to every last detail.

The supply chain for large-scale projects is often too complex to divide up while still guaranteeing an excellent final product.

This is precisely why we've specialised in turnkey solutions and why we work side by side with architects.

To optimise how work is managed and overseen, we've developed a computer program based on our extensive experience that helps efficiently coordinate people and resources. This offers both us and our clients the ability to monitor the project in real time.
