**TAILOR BED LIVING**

OrsaMaggiore® TAILOR BED LIVING

# The bed like you, the rest you deserve

## **Tailor Bed Living**

develops an exclusive concept of contemporary elegance, 100% Made in Italy, characterized by research and experimentation with textiles.

New ideas for bedroom decoration come from research into materials, creativity and experience, expression of a modern and elegant lifestyle which dress the bed with a refined taste.

The bed linen collection **Orsa Maggiore** – *Tailor Bed Living* arises from the will to produce everything for well being, as well as the iconic mattresses Orsa Maggiore.

So precious natural yarns become exclusive fabrics which create a soft and illusionist atmosphere. Elegance and coziness welcome you in deserved relaxation, because we know well that a good rest should be first regenerating, but from time to time we like to be cuddled, too. Simple “sleep” is filled with emotions, rest revitalizes and a wave of energy takes on the new day.

# Expression of passion for Made in Italy

The best yarns are the protagonists of the textile collection **Orsa Maggiore - Tailor Bed Living** for the bedroom, featuring elegant plain colours and jacquard wefts, and enriched with precious and original details. Bed linen designed not only for its natural function but also to decorate with style and elegance.

The undisputed quality lies in the careful choice of yarns, in the care of details and in the meticulous manufacturing processes, absolutely Made in Italy.

Top quality fabrics are cut and sewn by expert craftsmen and turned into refined and tasteful bed collections, where each piece is handmade and subjected to rigorous quality controls, in the knowledge that it is the care of details which makes the difference. So fabrics which are already precious are further enriched with the finesse that distinguishes an exclusive product of a superior quality.

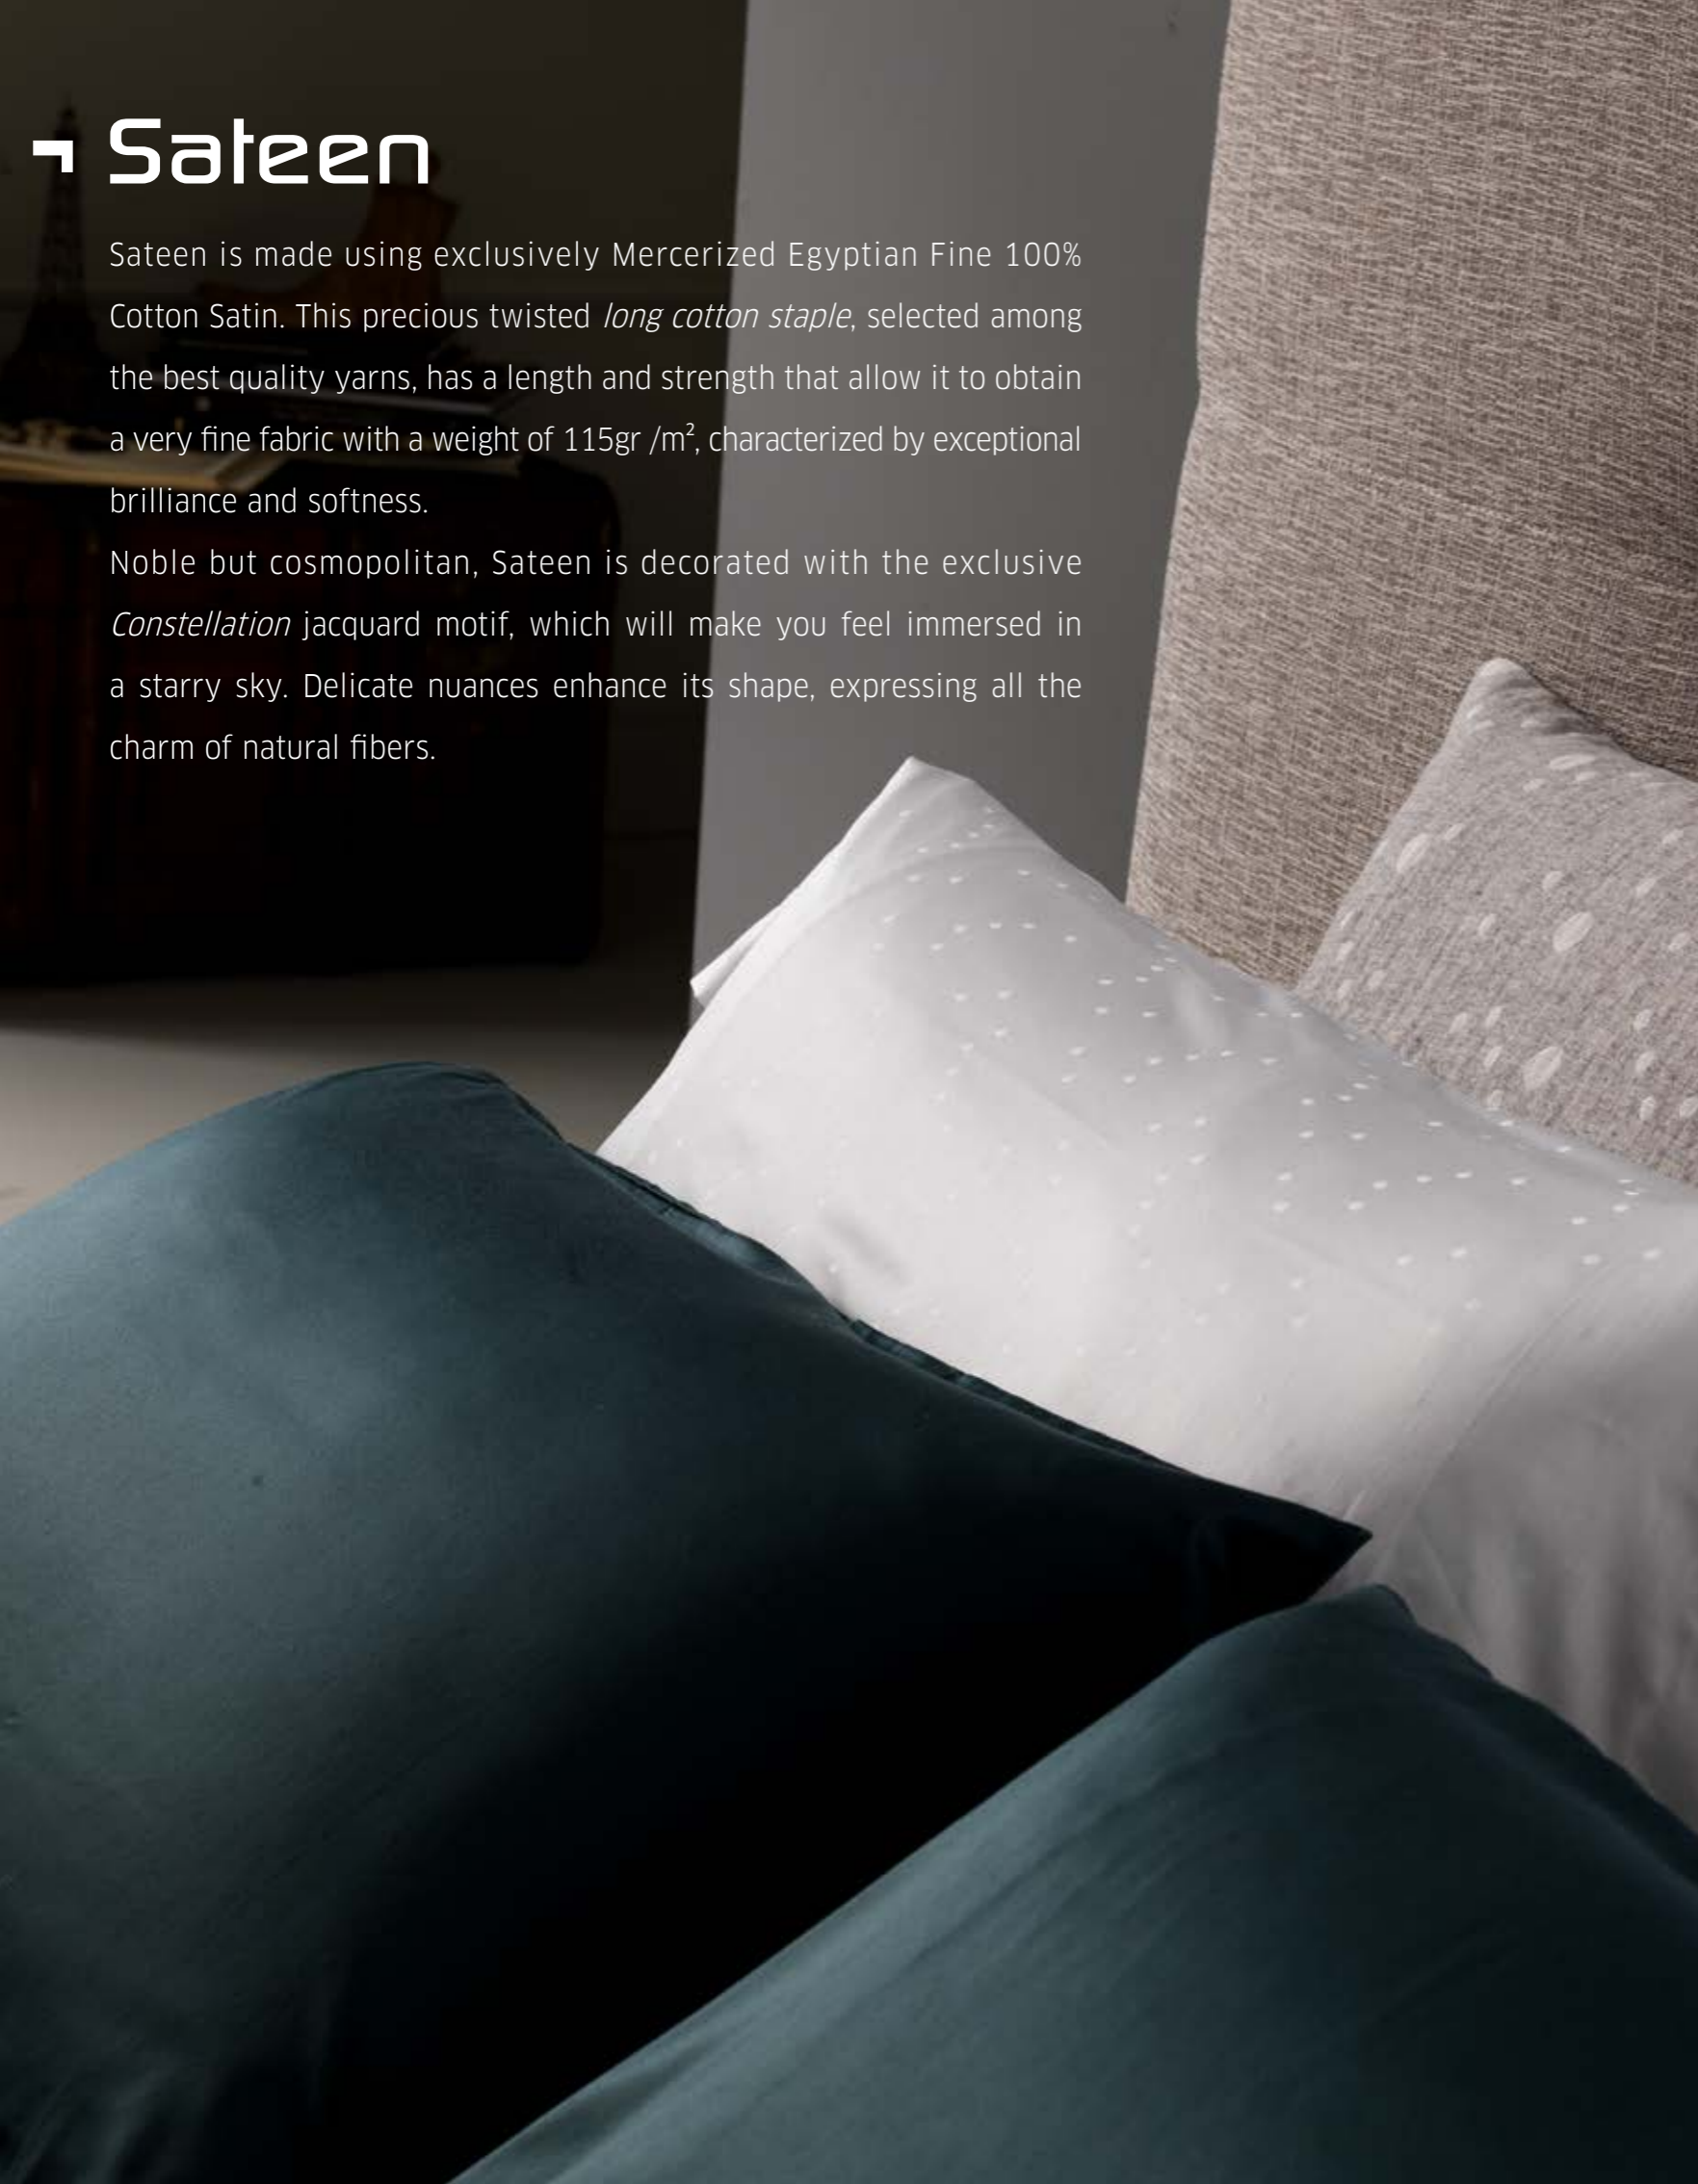

No effort is spared when it comes to improving quality and style constantly. It's a production philosophy which mixes techniques and fabrics of an Italian tradition as old as wisely handed down from generation to generation.

# ↳ Sateen

Sateen is made using exclusively Mercerized Egyptian Fine 100% Cotton Satin. This precious twisted *long cotton staple*, selected among the best quality yarns, has a length and strength that allow it to obtain a very fine fabric with a weight of 115gr /m<sup>2</sup>, characterized by exceptional brilliance and softness.

Noble but cosmopolitan, Sateen is decorated with the exclusive *Constellation* jacquard motif, which will make you feel immersed in a starry sky. Delicate nuances enhance its shape, expressing all the charm of natural fibers.

↳ Lino

Elegant and sophisticated, linen is a natural fibre which hides all the virtues of a plant that has a millennial textile history, and which has always been known to mankind for its properties. From the finest fabrics to the most innovative garments, linen is a raw material appreciated by the most illustrious stylists in the world who start from its essence to design their works.

In its natural nuances, intimate and cozy, this noble material suits the luxury codes of those who can grasp the elegance and refinement of a natural product, symbol of a contemporary lifestyle, ecological and attentive to sustainable development.

# Seta and Cashmere

There are such fine and exclusive yarns that do not need artificial decorations to express their elegance.

Silk and cashmere are renowned for their lightness, thermal properties and pleasant and velvety feel. Consisting of thousands of very soft fibres, the fur of Cashmere and the fine silk organzine create superb fabrics that are pure poetry.

Classic nuances and mother-of-pearl details recount a refined and charming bedroom. As if from a historic Italian tailoring, the pure silk parure with duvet cover and pure cashmere blanket show the style and quality of the high manufacturing, in balance between classic and modern, minimalist and exuberant.

▸ Quilt  
Coverlet  
Plaid

In the intertwining of the *Constellation* jacquard weft, linen and wool meet in a weaving artifice, giving the coverlet and plaid the natural charm that shines in everyday life, while the cotton satin quilt becomes the ideal accessory of a modern and classy bedroom. A contemporary style, refined and never excessive, further refined by the precious details that blend delicately with the bed sets.

Quilts, coverlets and plaids are very versatile items, which enrich the bed from the decorative point of view and have the function of light blankets in the middle seasons at the same time. The natural yarns with which they are made emphasize these qualities, give personality and style to the bedroom and guarantee an healthy and peaceful rest.

→ Piuma

The pleasant sensation of being touched and bounded by something that doesn't seem to have any weight: this is the magic of the feather that, owing to its excellent thermal properties, is loved by those who find wellbeing in an enveloping warmth. Enhanced by modern technology, now solid partner of noble and natural raw materials, feather quilts and goose down are ancient works refined over time, where classic and modern meet and merge.

Feather is soft and light but at the same time warm, waterproof and breathable. Combined with an easy maintenance and biodegradability, these features make this element unique. As unique as the respect of quality standards, nature and animals, guaranteed by the numerous certifications that must be demonstrated and product labeling: each item is tracked, and the origin and care of the animal is known.

### Orsa Maggiore - *Tailor Bed Living*

bed linen is made to fit to the most common bed and cushions sizes: double (mattress size up to 180x200x30cm) and king size (mattress size up to 200x200x40cm).

When choosing bed linen, always bear in mind the size of the bed and most of all the height of the mattress. This size must be considered especially for the undersheets, to suit properly the bed.
