# About us

Our family has always been dealing with wood. From its selection to the realization of the finest furniture we take care personally of every phase in between utilizing the skill that has been transmitted from our fathers to us.

To the normal carpentry work, in order to enrich our realizations, we are able to add the art of hand carving and marquetrie. Carving means sculpturing the wood like the artist do with marble;

Marquetrie is a fine work of insertion of a very thin layer of different wood essences into a flat surface to obtain the same effect that a painter gets by using the colors to create a picture.

Our attention to the detail makes the difference between a nice piece of furniture and a masterpiece. To control the complete production process and obtain the best possible results we also do the finishing inside our factory.

# Wood

# BO-W01
