The Bioformula Delivery System of Active Ingredients

Cyclosystem Complex®

Cyclosystem Complex® is a delivery system with slow release of active ingredients, based on Cyclodextrins. The active ingredient is totally or partially encapsulated in the Cyclodextrin, without significantly modifying its structure.

It is therefore isolated from the external environment and protected against oxidative and degradative processes. This encapsulation is reversible and it allows the active ingredient to be released gradually, carrying out a prolonged action over time.

Liposystem Complex®

Liposystem Complex® is a system based on phospholipids to increase absorption of active ingredients. It produces liposomes with a very high encapsulating capacity, ensuring a reliable carrier effect.

The Sebum-compatible composition of the liposomes ensures the on-site release and absorption of the active ingredient that passes through the skin barrier.

Bioformula has designed dermocosmetic formulations for skin wellbeing, which feature two delivery systems of active ingredients, developed by our laboratories.

All products are tested and bottled in an airless pack to prevent in-use contamination and oxidation. The airless pump bottle allows the extraction of a more accurate and homogenous amount of the product.

BioHydra

BioHydra is a face cream with moisturizing ingredients: Moisturizing factors, Phytodermina C and Allantoin. This dermocosmetic has a light texture featuring an intense moisturizing and revitalizing action.

The mix of **moisturizing factors** in Cyclosystem Complex® and **Phytodermina C** restores and maintains the right degree of hydration in the skin. It also carries out a nourishing and rebalancing activity.

Allantoin, with its soothing property, completes the revitalizing and protective action.

Applied regularly, BioHydra helps preserve the skin's natural hydration, improving the appearance and vitality of the face. Recommended for dehydrated, young and mature, dry and combination skin.

Packaging: 50ml Airless Bottle
Code: 6951

BioLenitive SPF25

BioLenitive SPF25 is a face cream with a soothing action and sun protection. Ingredients of this dermocosmetic include Vitamin E, 18- β -Glycyrrhetic Acid, Encapsulated Sunscreen Filters, Zinc Oxide and Lanolin.

Vitamin E helps counteract skin aging and dehydration, while **18- β -Glycyrrhetic Acid** in the Liposystem Complex® and **Lanolin** have a soothing and emollient function on irritated skin.

Encapsulated Sunscreen Filters and **Zinc Oxide** complete the protective action. Applied to particularly sensitive skin, BioLenitive SPF25 helps restore the natural balance of the epidermis by carrying out a soothing action against the appearance of redness or skin problems. Recommended in case of dry and reddened, young and mature skin.

Packaging: 50ml Airless Bottle
Code: 6651

BioGel Eye Contour

BioGel Eye Contour provides lifting ingredients Phyto-dermina Lifting® and Retinol. It is a dermocosmetic with a tensor effect for the eye contour and a pleasant texture, easy to apply and rapidly re-absorbable.

The **Retinol** in the Liposystem Complex® promotes cell renewal, stimulating the synthesis of Collagen and Elastin.

Phyto-dermina Lifting® has a high tightening effect. Applied morning and evening, BioGel Eye Contour promotes the natural cell turnover in the eye area, leaving the skin smooth. Recommended in case of dry, mature skin and small wrinkles around the eyes.

Packaging: 30ml Airless Bottle
Code: 6946

BioSolar SPF50+

BioSolar SPF50+ is a facial sun cream with very high protection. This moisturizing dermocosmetic includes Phospholipids, Vitamin E and Encapsulated Sunscreen Filters with SPF50.

Sunscreen Filters encapsulated in the Liposystem Complex® ensure a broad-spectrum skin defense against UVA and UVB rays. The addition of **Phospholipids** and **Vitamin E** supports the skin barrier and ensures a moisturizing nourishing effect. BioSolar SPF50+ has no fragrance. For all skin types.

Packaging: 50ml Airless Bottle
Code: 6653

BioColor & Care

BioColor & Care is a post-treatment face cream with very high sun protection with 18-β-Glycyrrhetic Acid, Hyaluronic Acid, Urea, and Encapsulated Sunscreen Filters with SPF 50.

The dermocosmetic is rich in ingredients with an emollient, soothing and moisturizing action that evens out the complexion after aesthetic medicine treatments.

The **18-β-Glycyrrhetic Acid** in the Liposystem Complex® guarantees a soothing and repairing action for skin stressed by aesthetic treatments. **Urea-crosslinked Hyaluronic Acid** provides deep skin hydration and **Encapsulated Sunscreen Filters** ensure a broad-spectrum defense against UVA and UVB rays. The lightly coloured pigments conceal imperfections, making the complexion brighter and more homogenous.

BioColor & Care is recommended after medical-aesthetic treatments and can also be used as a daily base cream. Easy to apply, it provides immediate comfort. For all skin types.

Packaging: 100ml Airless Bottle
Code: 7579
