

*Plenhyage XL: The
Evolution of Polynucleotides*

Aesthetic Medicine made in Italy

Plenhyage XL from Bioformula is a polynucleotide-based skin injectable that improves skin elasticity and is effective against aging, photoaging and for treating fibrous tissues. Its hydrating and anti-free radical activity help create the ideal environment for fibroblast growth, thereby restoring tissue elasticity and promoting cell turnover.

Plenhyage XL is the medical aesthetic treatment that naturally restores the optimal conditions of the skin for both face and body.

Plenhyage XL: *Suggested* *Treatments*
